

BROADCAST CONTENT SCREENING SERVICE SYSTEM AND METHOD

ABSTRACT:

The present invention provides a system for screening
5 broadcast programming. A viewer is configured to receive
broadcast programming and to present the broadcast
programming to a user. An interface is configured to
receive user input from a user, the user input comprising at
least a content of interest start time based on the
10 broadcast programming. A processor is coupled to the
interface and configured to store the user input and to
generate a screening signal based on the user input. In a
particular aspect, a broadcast recorder is coupled to the
viewer and configured to store the received broadcast
15 programming.
